Narcissist And His Children: Parental Alienation Syndrome At Ts Finest

Synopsis

The narcissist is a force to be reckoned with. He is the reason that the courts are filled with nasty custody and divorce battles. He is passive-aggressive, fatalistic, negativistic, critical and stubborn. The narcissist uses many tactics to alienate the children from others in their life. He is one of the reasons that Parental Alienation exists. This audiobook seeks to discuss the various tools that are launched against the children of the narcissist. If the children are not cared for adequately by others due to the narcissist's immature behaviors, the deprivation of their needs by the narcissist will ultimately cause the children to also grow up being narcissistic or emotionally immature in their relations with the world around them. They will view the world as a hostile place with little forgiveness. Our goal is to educate those who work with or live with children. Many parents who are up against a narcissist in a custody battle or in a divorce tend to give up custody to the narcissist. Or they might lose custody to the narcissist. One doesn't have to be the victim of a narcissistic parent or of the parental alienation that happens due to Narcissistic Personality Disorder. A person can learn about Parental Alienation, the tools involved, and better prepare for handling the immature narcissist in court and in life. Download now to fix your future with your child! Act now before it is too late and the damage is done!

Customer Reviews

This short read has important and helpful information about narcissistic abuse and parental alienation in simple, easy-to-understand terms. It's a great tool for parents and professionals alike. However, there isn't much information on the solutions for dealing with a narcissistic partner in a divorce or custody battle. The authors assume that the court system appreciates and sides with

the mature adult/parent, when that is not always the case. Only a small percentage of narcissists are diagnosed (1% of the population) because of the very nature of the disorder. Narcissists don't think there's anything wrong with them and therefore, go undiagnosed unless they're forced by Law Enforcement and/or a Judge. But first, they have to warrant such an order, which rarely occurs because they know how to manipulate the system and most Judges don't know enough about abnormal psychology to know what to look for. It is imperative that any target of Parental Alienation document every offense, every incident, every comment or slight involving the narcissist, especially if there are children involved. Go to a qualified psychiatrist, experienced in child and adolescent psychology to have the children evaluated for PAS (in some states, you can have them involuntarily committed for 72 hours to be evaluated, but check your state laws). You can do very little until the court system is aware that there is documented evidence of abuse or a professional evaluation has been performed. The narcissist is afraid of being exposed and will do anything to prevent it, so watch your back!!

Very informational book. Quick, easy read. Full of information that was given from a little different perspective. Highly recommend to anyone dealing with a difficult custody situation (as if any of them are not difficult right?...;)
