The world of natural and handmade skin care is a popular one. Every day countless new brands launch their carefully formulated lines of cosmetics into the arena. Our industry has become abuzz with fresh faces and hopeful beginners, each dreaming of creating a handmade beauty empire to call their own. I am really fond of make-up and cosmetics and I must say that I had never thought I would find so much useful and practical information in a book related to homemade organic make-up products. This beautiful book shows you how to make your own handcrafted, organic makeup, soap, and perfume using essential oils and other natural ingredients. With this book, you can personalize your beauty regimen without standing in line and without spending tons of money.

I downloaded this ebook for Free from ! Well this was an interesting read! I'm new to the DIY world as well as the cosmetic world so who knew I could make my own! I never used makeup because for me, it dried my face out so I wouldn't use it! I am definitely excited to try some of these recipes!Disclosure: I downloaded this ebook for Free from .

I like to give gift baskets with heartfelt letters to all the women in my life and often times I think that makeup would be a good part of the basket. the issue is that it is usually expensive and there is something cheesy about giving an item which people know the price of or see at the local target. Now I will be making the recipies in this book (especially lip balms) and giving unique gifts which will be appreciated all the more :)

I'm trying to go all natural with my family's skin and hair care products , this includes make-up . I didn't find anything in there to help me make cosmetics/make-up ! I already make my own lotions , moisturizers , soaps , ext.

This book is perfect for those who want to make their own organic and natural makeup and other beauty products. Aside from the fact that this can save you money, you can make sure that these products are safe to apply on your body. The procedures were properly explained and they seem easy to follow as long as you have the right ingredients and the time to do them. Great book and highly recommended!

I've been researching natural makeup recipes online and in various e-books. This is such an interesting one! Make up products in the market are indeed expensive so I might as well switch to using DIYs. Not so expensive and safe to use. This e-book provides clear instruction, easy to understand and easy to follow.. Love this book! Recommended!

I have a mixed opinion about this book I really like the DIY products .when ingredients such as castile soap , beeswax are used. I rather like to work with this kind of food ingredients is the less part of the book. I have tried some make up , the natural blush , which gives quite a nice result

Great!! I loved this book, not only does it have make-up recipes but skin and hair care as well. plus ideas for natural deodorant and other helpful creations to pamper yourself. I love natural ingredients and I prefer to not overload my skin with chemicals so I thought this book was very comprehensive.
