30 Days To A Well-Mannered Dog: The Loved Dog Method

Synopsis

Widely regarded as the anti-Cesar Millan by dog owners and experts, Tamar Geller's nonaggressive approach to dog training is based on love, play, and mutual respect between dog and owner - much like how a wolf plays with its young. Using a combination of child psychology and animal behavior science, Geller revolutionized the way Americans train their dogs and has won the approval of the Humane Society, for which she is a longtime adviser. Now she expands on her play-training methods and offers a day-by-day, easy-to-follow plan for raising a happy and well-mannered canine. In this step-by-step guide, Geller gives dog owners all the essential training instructions, insights, and tips, including housebreaking, socialization, commands, hand signals, games, developing a routine, and much more. Throughout, Geller explains theories on how dogs think and breaks down dogs' basic needs in simple yet engaging language. She also makes fascinating connections between raising a puppy and the process of nurturing a toddler that will shed new light on dog training. Whether it's a new puppy from the pet store or a rescue dog from the pound, this is the ultimate go-to reference for anyone who decides to bring a new dog into their home - or improve the behavior of the family dog in just one month. Turns out, you can teach an old dog new tricks!

Customer Reviews

It is a well written, useful book and insightful book. I do not necessarily agree with everything she says but overall it is a very useful book and one of the better ones I've used. I have two young puppies and the 30 days is a bit quick for them. I have trained a retriever in the past with better luck

using an old book that unfortunately I don't remember the name or author. Some of the techniques the author uses did not work with my pups.

love the concept

Very helpful - I really got a lot out of it and have been using a lot of the techniques with my rescue dog with great success.

This book completely changed how I interact with my dogs. I want everyone in the world to read this book and treat their dogs better. My mom gave me this book to read and I read it out loud to my husband on a long roadtrip. He was completely changed by it as well. I think we both just kind of had an epiphany while reading and trying to understand what she is saying in this book. This book is a better outline on how to train your dog and leaves out a lot of the biography that is in the first book (brown book), but like the first book this is a book that tries to explain how to treat your dog and why. The process can't be a bulleted list. It's not a list because it's real life and requires real dedication and daily love. After reading this book, I realize that I don't have to raise my voice or use physical punishment like I've been told by "trainers." I have an English bulldog and I had an incredibly hard time training him despite the help of multiple "trainers." At the age of 4 and 5 he was still having accidents in the house despite using the methods they recommended. The truth is that yelling, screaming, hitting, shoving his nose in excrement and acting like a psycho is the wrong way to communicate. All the while he wasn't getting enough interaction, mental stimulation, and exercise (bulldogs are not actually lazy and mine happens to be really smart). Now I understand why this never felt like a natural way to interact with him and I can see now that it was hurting my relationship with him. I don't have to prove that I'm the alpha because he already wanted me to be the alpha - instead I was some crazy lady he was forced to live with. I am so glad that I was given this book before I adopted our 2 french bulldogs. I really feel like we have an understanding and a deeper relationship - one that my English bulldog (now 8 & 1/2) has also benefitted from. I can see a world of difference in him - one that comes from being free to express my love and affection for him without worrying about what the trainers told me to do. I focus more on his happiness and make sure his needs are being fulfilled. I bought 10 more books and sent them to my mom for her to give to others who would read this book and change their relationship with their wonderful dogs for the better. I truly believe that dogs are God's most perfect image of angels - that they are sent here for us to love and protect - that he entrusts their souls to us. If we can be even a little bit as good as our

dogs are, then we will be closer to heaven. My dogs fill a void in my life that humans could never, and I owe the ability to have a loving relationship - that doesn't involve brutal training methods - to Tamar Gellar and this wonderful book. I promise you that these methods work - much like teaching a child in an encouraging environment. I often visualize my dogs as a child that doesn't speak English - this allows me to be patient with them - and completely amazed when they display their brilliance. It is real love and, truthfully, so much fun to explore the world with them in this way. Thank you again Tamar for writing this book and changing the world with your message.

Excellent information, well organized, easy to use.

What a great comprehensive guide to a well mannered dog! I love this method. It works and every dog owner should have one.

I wish the book was more concise with less fluff. Also, the number of times she says she will cover a subject later is frustrating.

This was suggested to me as a virtual "bible" by several people. The trainer I use thinks that it's been so many decades since domesticated dogs could be compared with wolves that much of it is inappropriate. But both agree err bed to think like dogs do for successful training, and that makes sense to me.
