# **Homemade Repellents: 31 Organic Repellents And Natural Home Remedies To Get Rid Of Bugs, Prevent Bug Bites, And Heal Bee Stings (Home Remedies, ... Homesteading, How To Get Rid Of Bed Bugs)**

## Synopsis

In the last few decades, people all across the planet have come to a realization – many of the products that we use everyday are made from harmful manmade chemicals. This extends to the repellents that we use for insects and other pests. While effective at thwarting off nature’s critters, the long term effects of some early manmade pesticides and herbicides are just coming into the light. We have seen the harmful effects from years of these dangerous manmade chemicals. From an increase in cancer rates to a shocking rise in the number of reported cases of autism, our modern world has provided great wonders that all too frequently are harmful for our body. The insect and bug repellents that are being sold today are wholly unnecessary. There long existed proven methods to repelling pests that do not rely on harmful chemicals. Using common ingredients from nature and around your home, this book serves as a guide for creating sprays and ointments that will keep bugs away from you and your home, without you having to worry about the after effects. The methods to repel insects in this book absolutely work. I have tested them myself and refined their formulas many times over the last five years. I come to you now with an answer, one that will solve repelling outdoor pests while still being an entirely natural solution. Start reading today and protect yourself from both harmful manmade chemicals and nature’s pests. In This Book You Will Find:

- A brief overview of the benefits of natural bug and insect repellents.
- Natural and proven methods of repelling bugs, insects, arachnids, and other critters.
- Formulas that have been used personally, by me, and been tweaked for years to produce the best possible results.
- 31 proven methods for repelling just about every type of bug or insect.
- Tips for how to secure your home from nature’s infestations. Hope to see you inside! - Daniel Beaumont

## Customer Reviews

This is a good book on a lot of natural repellents for ants, mosquito, Roaches, flies, ticks, spiders, bed bugs, cloth moths, lizards, cicadas, and gnats. Add a bit of citronella oil for making any spray stronger. On bed bugs the first method will be your best bet to firmly eradicate any bed bug infestation you might have. It's an old world method, but it does work extremely well. Simply heat up some water and mix in soap until you have a nice mixture that is naturally has bubbles that form at the top. Take a fresh clean sponge and dip it into the mixture. You will want to rub the sponge over your mattress several times. You do not want to get the mattress so wet that it cannot dry, but instead just get the surface a little bit wet. The real goal here is to spread the soap, and water just acts as a conductor for spreading it evenly around the surface of the mattress. After you've done both sides, and the side strips, take a second fresh sponge and wipe down all surfaces of the mattress. You want to get it dry as possible. The whole process should take 45 minutes to a hour. and I would do this in the morning so that you have time for the mattress to dry out so you can sleep on it. For computers and couches and other bed bug infested items, or on the road use grain alcohol and water. Mix 1 part of grain alcohol to 3 parts of water in a spray bottle. Spray inside electronic items as far as you can get it turn off electricity to it and do not plug it in until 24 hours later. If the mixture has a unpleasant odor add a couple drops of lemon essential oil to it. I have used this on couches.

I live in a basement and it seems to be infested with all types of bugs, spiders, wood bugs, moths, ants, flies you name it. I've been trying to let them be because I prefer not to use man made chemicals. This book has given me natural solutions to all of my bug problems. All of the repellent recipes are simple 2-4 ingredient which is a bonus because I don't want to spend a bunch of money, some of the ingredients most people have in their pantry already. For example the fly recipe is only lavender oil, citronella oil, mineral water and a spray bottle, so easy! I find this book to be very helpful, it even gives you ways to bug proof your entire outside to catch the critters before they enter. This can be done with regular table salt but be cautious if you have deer in your neighbourhood because "deer will be attracted to the salt and they will seek the surfaces where it is

located" This book was a great purchase!

There are a lot of bugs and especially mosquito in my area. This is a pretty guide teach you how to make homemade repellents. So far the recipes in the book work very well for me.

This book was very informative on ways to get rid of most household pests. Most of the solutions were easy to make out of stuff easy to find. It still was missing some bugs but generally had most if them

great book. I needed to find some new homemade repellents, and im glad I have found this one. Must read !

Ok book but it repeats itself with few actual recipes

It is very informative and gives great tips to keep insects away from you. A lot of these repellents are natural and smells wonderful in your breathing environment. I tried making one of the suggested homemade concoctions suggested in this book and its truly effective. It was a very informative and well written book. Great read.

I have tried the remedies for ants, gnats, flies and mosquitoes and was delighted with the results. It is comforting to know that I am deterring the pests and not introducing any harmful chemicals to do so. The remedies I used worked just the way Mr. Beaumont promised they would.
